Losing Business?

Bodyshop repair business is competitive. If you're not using the latest techniques, you've probably discovered a loss of business due to:

- ✓ Decline in jobs to your shop
- ✓ Lack of new customers
- ✓ Loss of time

In addition, during hail season, you've seen much of this business go to "hail chasers" who travel the country providing hail damage repair. Their advantage is **paintless dent removal**.

Paintless Dent Removal Training

Paintless dent removal has also become a requirement of insurance companies—many of which are no longer paying for traditional shop repair. To meet today's needs, the solution is to get your shop staff trained in paintless dent removal.

Destiny International, LLC is available to give you the training to regain your profits. We teach you how to use precision tools and specialized training to remove unsightly dings, dents and hail damage from cars.

Our paintless dent removal method is faster and less expensive than traditional body shop repair and it requires absolutely no costly and messy filling or painting. These techniques save countless manpower hours and allow you to raise the productivity level of your shop.

Experience Counts

Our skilled professional staff is committed to staying current on any and all new developments and training techniques within the automotive metal repair industry.

- Destiny International has trained thousands of G.M., FORD and Chrysler employees in five countries
- We are trained and certified by General Motors-North American Operation
- EXEL, QS 9000 Quality System Certified
